MELVIN GAMANA JR

Software Engineer| Software Developer| Full-Stack Developer

09773366514| melvingamanajr@gmail.com | github.com/melvingamanajr | linkedin.com/in/melvingamanajr/

PROFESSIONAL SUMMARY

Software Developer with 2 years of experience building web applications, fixing code, and managing databases. Proficient in Java EE, Jakarta EE, and Spring, alongside modern frontend frameworks like Vue 3, TypeScript, and connecting website systems, with a strong history of making web pages load 20% faster and reducing system bugs by 30%. Experienced in training new team members, writing clean code, and working with teams to launch successful new features. Dedicated to using strong problem-solving skills to build fast, reliable, and helpful software for top companies.

WORK EXPERIENCE

Software Developer July 2024 – Present

Alliance Software Inc.

- Successfully migrated and refactored old codebases from KnockoutJS and Vue 2 to Vue 3. Used Composition API and Pinia to make the app faster and easier to maintain.
- Designed, configured, tested, debugged, and maintained robust web service applications and backend workflows utilizing Java EE, Jakarta EE, and Spring, implementing secure controllers and robust mock controllers for efficient unit testing and high availability.
- Built responsive, user-friendly interfaces with Vue 3, decreasing page load time by 20%.
- Collaborated with cross-functional teams to launch five new features, raising user satisfaction by 15%.
- Integrated RESTful APIs and backend services into frontend architectures efficiently.
- Mentored 2 junior developers on code standards and modern framework patterns, improving team code quality by 10% and accelerating onboarding timelines.
- Reduced bug incidents by 30% through proactive debugging, refactoring, and performance optimization.
- Enforced clean, reusable, and scalable code practices following industry standards.

Web Developer Intern January 2024 – May 2024

Municipality of San Juan, Southern Leyte

- Helped make and fix programs and databases for town offices.
- Worked with PHP, MySQL, JavaScript, HTML, and CSS in creating system features and user interfaces.
- Collaborated with staff and team members to improve system performance and usability.

PROJECTS

Real-Time Attendance Monitoring System – Face Recognition (Capstone) January 2023 – June 2024

- Designed and developed a web-based system that automates attendance tracking using facial recognition technology.
- Optimized database queries reducing data retrieval time by 35%.
- Conducted comprehensive testing to ensure accuracy and system reliability.

TECHNICAL SKILLS

- **Frontend:** Vue.js, HTML, CSS, JavaScript, TypeScript, Vue 3, Vite, Pinia
- **Backend, Databases & Languages:** Java (Java EE, Jakarta EE), Python, jQuery, Java, PHP, C#, MySQL, REST API Integration
- **Testing & Tools:** Unit Testing (Playwright), Git, GitHub, VS Code, Postman
- **Other:** Responsive Web Design, Debugging, Problem Solving, Agile, Software Maintenance

EDUCATION

Bachelor of Science in Information Technology - Programming August 2020 – June 2024

Southern Leyte State University – San Juan
